---
Message from the Chair:

Greetings! We had another great group of applicants to the residency program this year—in fact, over 1,000 of them, vying for 15 spots in our program! Much thanks to our amazing residency leadership, coordinators, and all of our faculty and residents who participated in the many interviews, tours, lunches, and dinners. Again, special thanks to Richelle Cooper (1998) for putting together another terrific newsletter to show what’s going on in our program.

I’d like to point out just a few highlights from the past few months:

**Medell Briggs** will be expanding her role at UCLA in 2020. In addition to working clinically in the ED and serving as our departmental Director of Quality, her new role is the Medical Director of Clinical Effectiveness for UCLA Health (for the entire organization).

You’ve probably noticed that **David Talan (1986)**, infectious disease guru, has been seen around conference a lot lately, and even working some shifts at Reagan. Fortunately, he has decided to stick around UCLA, teaching our residents and students (and faculty), mentoring in research (particularly clinical trials and young investigators), and doing some clinical work—a great benefit for all of us!

Guess who is the second (the first since 2005) and only female Deputy Editor for *Annals of Emergency Medicine*? Our own **Richelle Cooper (1998)**! In her spare time, Richelle will now help to run the #1 journal in our specialty, in addition to continuing as our departmental Research Director. Go RC!

He’s Baaaaaack! After a long absence, **Mel Herbert (1995)** returns as a Clinical Professor of Emergency Medicine at UCLA (where he belongs). While he continues to expand the EM:RAP empire, he will help us with educational activities and our new AIME (Access and Innovation in Medical Education) fellowship. Welcome back, Mel!

Got Tox? Well now we do. **Michael Levine** will be joining our faculty in March, working clinically at both Olive View and Reagan, and establishing a Toxicology consult service at Reagan. Michael is an accomplished academician with numerous publications and presentations, and will be a great asset to our department. He completed residency at the Harvard Affiliated program, Tox fellowship at Good Sam in Phoenix, and has been on faculty at USC. Please give him a great UCLA welcome.
We also have some amazing new fellows who will be joining us this summer, and five of our current fellows will be returning for a second year of fellowship: **Judy Choe** (VEP Admin), **Brittany Guest** (AIME), **Hannah Janeway** (IDHEAL), **Stephen Villa** (Med Ed), and **Kimon Ioannides** (National Clinician Scholars Program (NCSP)). Our new fellows include:

**Jesus Torres** (NCSP and IDHEAL). Jesus grew up around Sylmar and was a research associate at Olive View Medical Center in the ED. He went to UCLA undergrad, NY Medical College, Harvard Public Health, then trained in EM at UCSF, and now returns for fellowship. He will work his clinical shifts at OV.

**Max Berger** (Medical Education). Max went to UCLA undergrad, USC School of Medicine, and will finish EM residency at NYU/Bellevue. His clinical shifts will be at the VA, OV, and RR.

**Anna Darby** (NCSP). Anna joins us from Brown undergrad, Mount Sinai Medical School, Harvard Public Health, and USC EM residency. She will work clinically at the VA.

**Kareem Agunbiade** (Ultrasound). Kareem went to Stanford undergrad and U of Chicago medicine. He is an EM resident at Cook County and will work clinically at the VA, OV, and RR.

**Annette Dekker** (Research). Annette attended Princeton undergrad, Northwestern School of Medicine, and is completing her EM residency at U of Chicago. Her clinical work will be at Santa Monica.

Sounds like a pretty impressive bunch. I’m sure you’ll enjoy getting to know them and working with them.

Respectfully submitted,

**Greg Hendey (1993)**
Chair, UCLA Emergency Medicine

The **UCLA DEM mission** is to be a global leader in Emergency Medicine by:
- Providing excellent care to all patients we serve
- Conducting leading-edge research that advances the health of our patients and community
- Training physicians to be innovative and inspiring leaders
We continue to have the All-LA conference, a combined EM conference amongst the three Los Angeles residency programs twice a year. The conference hosts and locations rotate to the various sites. This September our program hosted and we had our own version of SMACC critical care conference. There was a great turn out! Guest lecturers including alumni Ilene Claudius (2002), Antelope Valley Partner Travis Deuson, and panels covering a variety of critical care topics.

Career Day 2019

CalACEP in September 2019 in Orange County, and the UCLA Residency program past and present were well represented:

Medell Briggs-Malonson delivered the keynote address;

Anna Yap (2023) received an award for her work with the California Medical Association and delivered a talk about CAL/EMRA and getting involved;

Reb Close (2003) one of our CalACEP board members spoke as part of a community EM panel;

Sara Crager (2015) and Eileen Shu (one of our former undergraduate research volunteer assistants, and now a part-time provider at Antelope Valley Hospital) both spoke as part of a blended careers panel;

Andy Grock and Tomer Begaz both taught in the medical student track with lightning lectures and an “Ask the Experts” session on common questions for residency applicants;

Natasha Wheaton led a Financial Panel discussion, with our Harbor-UCLA colleague Ryan Pedigo;

Tara Paterson delivered a resident track lightning talk; Rebecca Bavolek lectured on “Things I wish I knew as a resident”;

Anna Yap and Rebecca Bavolek spoke with prospective residents at the medical student fair;

And…to top it off the UCLA department band Gravely Disabled again entertained the crowd during the closing reception.
This year’s September FemInEM FIX2019 conference was not only attended by several UCLA department faculty, fellows, and residents, but also featured lectures by two of our own. First year IDHEAL fellow Hannah Janeway delivered a session titled “You are more powerful than you think,” and received the first standing ovation of the conference. Watch her lecture on the FemInEM archives, to hear her recount witnessing the fatal shooting of 26 year old Ruben Herrera in the emergency department when she was an intern, and how she used her voice to speak for him. Breena Taira educated the crowd with her talk on “Achieving Language Justice in the Emergency Room.” Her lecture is not yet available for viewing on line, but check back as the FemInEM will be continuing to upload the lectures from the conference, and Breena is a national expert on this issue. Other UCLA attendees included, Claudie Bolduc (2021), Jackie Shibata, Cat Weaver (2017), and Harbor-UCLA colleagues Diane Birnbaum and Susannah Empson.

Residency Education Leadership Team Guest lecturing to Kaiser EM

The Kaiser 28th Annual National Emergency Medicine Conference organized by Gus Garmel at Kaiser Stanford was held this fall at the Ritz Carlton Bacara in Santa Barbara. Rebecca Bavolek gave a lecture on “Trauma Care for the Emergency Physician not at A Trauma Center” as well as participated in a panel discussion regarding “Women in EM”. Education fellows Stephen Villa, Kellie Kitamura (2018), and Steven Lai (2016) taught skills stations including chest tube placement and placing ultrasound guided peripheral IVs. Several UCLA alumni were attendees at the conference.
We had a great time in Denver in the snow, until we all scrambled to get to the airport and get one of the flights that was not cancelled back to Los Angeles.

At the ACEP Council meeting at the scientific assembly Anna Yap (2022) participated as CalACEP resident representative and Breena Taira served as an Alternate Councilor for the ACEP Social EM Section. Among the California contingent we spotted Antelope Valley Emergency Medicine partners Larry Stock and Mike Gertz, and alumni Reb Close (2003) and Ramon “Ray J” Johnson (1984) in the group. Congratulations to Ray J who was awarded the James D. Mills Outstanding Contribution to Emergency Medicine Award for his significant contributions to Emergency Medicine.

Breena Taira attended the ACEP International Ambassador’s meeting. She is the ACEP Lead Ambassador to Nicaragua. In this role, she has been a mentor for the ambassador’s medical student global health mentorship program. She delivered an ACEP presentation of their final project with the Deputy Ambassador and Liaison to Nicaragua as well as the medical student mentee. During this meeting she also received the Individual Achievement Award for the ACEP Ambassador’s Program.

Vanessa Kreger (2020) presented her preliminary results for her project with collaborators Haig Aintablian (2022), and Breena Taira, at the Research Forum Plenary session “Google Translate as a Tool for Emergency Discharge Instructions? Not so Fast?”

Hannah Spungen (2022) participated in council meetings as our EMRA representative, as did Haig Aintablian (2022) as the AAEM Resident Student Association president.

The UCLA IDHEAL group had several activities. Breena Taira helped organize and lead the community building collaborative session during the ACEP Social Emergency Medicine meeting. Harbor-UCLA colleague Dennis Hsieh gave 2 lectures “Social Medicine that Matters Most in the Trenches,” and “Breaking the Cycle: Implementing a Community Violence Intervention Program in the ED.” Breena Taira participated in a panel that presented to the EMRA Social Emergency Medicine Section. Congratulations also to Dennis Hsieh who was honored with the 2019 ACEP National Emergency Medicine Junior Faculty Teaching Award. “This competitive award honors (Dr. Hsieh) as an outstanding educator in emergency medicine and recognizes (his) tremendous efforts in advancing the specialty. It recognizes (his) excellence in teaching, including development of innovative educational programs, community education, and contributions to regional and global programs.”
Thanks to our residency leadership team, and especially our residency coordinator Jennifer Cassidy for planning an amazing alumni reception and dinner to honor the graduating class of 2020. It was great to see so many UCLA alumni residents and fellows.
Updates from our EMRA and AAEM Resident Representatives

Hannah Spungen (2022) our EMRA resident representative has worked to help pass several resolutions in EMRA relating to researching the impact of for-profit EM residency programs, opposition of immigrant family separation, the role of social work within the ED, and EM resident leave policies as well as mental health resources for residents. She attended ACEP Scientific Assembly in Denver and chaired the Tellers and Credentials Committee which is responsible for tabulating, recording, and certifying the results of elections.

Haig Aintablian (2022), the AAEM Resident Student Association President summarized some of the advocacy areas he has been focusing on with AAEM.

(1) President Trump signed an executive order (EO) on new policies to implement in Medicare, which include provisions to allow advanced practice registered nurses (APRN) and physician assistants (PA) to eliminate physician supervision requirements, to receive “equal pay for equal work” (Medicare reimbursing APRNs and PAs at the same level as physicians), and to enable APRNs and PAs to practice at the same scope of physicians. The AMA, State Medical Associations, AAEM, ASA, AAFP, and many specialty societies have come out in strong opposition. This EO, if fully implemented, would incentivize corporate medical groups to continue their trend of replacing multiple emergency physicians (EP) with a model of one EP overseeing multiple Non-Physician Providers (NPPs) as well as the new trend of EDs run solely by NPs/PAs without any physician oversight.

(2) Gun Violence Research: A tentative deal allocates $25 million of federal funds for gun violence research at the CDC and NIH. This is the first time that federal funding for this area of research has been allowed in over two decades.

(3) Surprise billing legislation - The Senate Health, Education, Labor and Pensions Committee, the House Energy and Commerce Committee, and the House Ways and Means Committee are attempting to introduce a bipartisan surprise medical bill. All the EM lobbying organizations (including AAEM and ACEP) are fighting hard to protect physicians on this issue, while respecting patients and patient care.

(4) Supplemental Video Interview (SVI) - After significant pressure from AAEM RSA, EMRA, AEROS organizations, CORD, and several other organizations, the AAMC has decided to withdraw the SVI from future residency applications. Reasons cited by AAEM RSA included the lack of research supporting its usefulness in selecting successful EM applicants and the increased funding burden to medical students once the pilot phase ended.

(5) The United States Government Accountability Office released a report on Medicare graduate medical education (GME) funding for nurse practitioner (NP) and physician assistant (PA) graduate training, suggesting that Medicare funding for MD/DO residencies should in-part be diverted to increase the number of NP and PA training opportunities. If this were enacted, there would be even less funding for medical residencies. Suggesting that training NPs and PAs would aid the physician shortage, disturbed many agencies, including the AAMC, AMA, etc.

Haig reports “AAEM RSA is tackling some other very important issues as well, including fighting to protect physician led healthcare in the setting of rising non-physician provider (NPP) scope of practice battles, protecting the integrity of ethical medical education free from corporate influences, and preventing over-saturation of the EM workforce with the rapid rise of EM residency programs run by corporate interests. To learn more about these issues and how to get involved feel free to reach out to Haig.”

CONGRATULATIONS HAIG! He was just re-elected for a second term as the AAEM RSA President, only the second resident physician to serve more than one term in the role.
This November, Medell Briggs-Malonson, Agatha Brzezinksi (2023), and Vanessa Kreger (2020) volunteered at the semi-annual Care Harbor mega-clinic downtown providing free healthcare services to low-income uninsured or under-insured individuals alongside many UCLA Family Medicine residents and faculty and a huge number of physicians, dentists and optometrists. Care Harbor is a grassroots response to the challenges of accessible care. From their website “At Care Harbor mega-clinic events, volunteer professionals, provider organizations and healthcare agencies come together to bring care to thousands of those in need. Those with nowhere to turn for the healthcare they need receive free medical, dental and vision services, along with the prevention resources and follow-up care that can empower them to lead healthier lives.”

Ashley Vuong (2022) organized a Feminine Hygiene Drive. She organized collecting feminine hygiene products and general hygiene products (like hotel toiletries extras) for donation to those in need in our community. These are products that are often desperately needed but often are not thought of when people make donations to shelters and community outreach organizations.

Danielle Antonuk (2021) and Pam Dyne (1995) arranged the annual Adopt a Family. The families are identified by the social work office who organize the endeavor at OVMC. We supported two families during the holiday season by raising more than $1500 dollars in addition to donated gifts and items the families had on their wish list.

Jessa Baker (2021), Ashley Vuong (2022), Theresa Cheng (2021), Vanessa Kreger (2020), and Breena Taira have completed Los Angeles Human Rights Initiative Asylum Clinic Training and they perform pro bono forensic evaluations to asylum seekers and other immigrants. The forensic medical evaluation documents evidence of torture and ill treatment and effectively communicates this evidence to adjudicators. Physicians provide expert opinions on the degree to which clinical findings corroborate allegations of abuse and educate adjudicators on the sequelae of trauma documenting their findings in a legal affidavit submitted to the court and are occasionally called upon to give testimony. The Olive View-UCLA Human Rights Clinic is a monthly academic clinic established with the goal of providing forensic medical and psychological examinations for survivors of torture and persecution seeking asylum. The clinic, hosted by Olive View-UCLA Medical Center, is run in partnership with Physicians for Human Rights. It is staffed by volunteer UCLA and Olive View attending physicians across a range of specialties and is also a teaching site for the UCLA Internal Medicine Primary Care Track and OVMC Internal Medicine residency programs. UCLA also has an asylum clinic.
When Hannah Janeway is not busy being a fellow, taking her master’s classes, working in the ED, teaching or working on any of her fellowship projects with IDHEAL, she helps direct a non-profit at the US-Mexico border called Refugee Health Alliance. Hannah first started to spend time in Tijuana when she was a resident, providing services to the IVDU community at the Wound Clinic under IDHEAL faculty Todd Schneberk and Mexican physician Patricia Zuniga. Refugee Health Alliance was formed in the fall of 2018, when Harbor-UCLA residents and local physicians began to provide medical care to asylum seekers at overcrowded shelters in Tijuana in response to increasing medical need secondary to new draconian policies by the US government. The organization’s mission is to provide ethical, holistic, and culturally-inclusive care, and advocate for all displaced and vulnerable populations in collaboration with activists and existing healthcare organizations along the US-Mexico border.

RHA currently runs a daily medical clinic at two sites in Tijuana in collaboration with local organizations Espacio Migrante and PrevenCasa. On Saturdays, RHA hosts pop-up medical clinics on a rotating basis at 23 shelters for asylum seekers across the city. They typically see about 220 patients a week, half in the weekday clinics that run 9a-2pm, and half on the weekends at the shelters. RHA offers primary and urgent medical care, naturopathic medicine, acupuncture, dentistry LGBTQIA+ care including gender affirming care for transgender individuals, psychological and psychiatric services, medical legal services, OB/GYN and women's care, midwifery, addiction medicine, and harm reduction. All of RHA’s activities strive to meet pro-liberation principals including 1) autonomy 2) collaboration 3) non-hierarchy 4) anti-imperialism and anti-colonialism 5) shared power structures and 6) trauma-informed care.

Hannah is a member of the Board of Directors of RHA, helps provide daily medical direction, and runs the clinical protocols committee, medical legal efforts, grants/finances. She also supervises both a medical student and resident rotation. The organization is funded by individual donations, private foundation grants, and the Trans Law Center, which supports RHA’s efforts to provide holistic and gender affirming care for transgender asylum seekers.

Refugee Health Alliance is dependent on volunteers and welcomes physicians, PA, NP, nurses, residents, medical students, translators and undergraduate volunteers for short term and longer term volunteer opportunities, as well as to conduct medical-legal forensic evaluations. Interested parties can contact Hannah or sign up directly through the website at https://www.refugeehealthalliance.org/
Project SEMILLA recently formed a new partnership with the National Autonomous University of Honduras (UNAH). Emergency Medicine does not exist as a specialty in Honduras and the Dean of the School of Medicine is interested in starting the specialty. As an initial step, Breena Taira, Luis Lovato (2001), Amir Rouhani (2011), Aristides Orue and IDHEAL fellows Hemang Acharya and Hannah Janeway, taught a course in cardiac resuscitation, identified a group of potential Honduran instructors, and taught a train the trainer course. These will be the initial project SEMILLA team in Tegucigalpa. We also signed an MOU between UCLA and UNAH and met with UNAH department heads and the international development bank to discuss formation of the specialty.

Sara Crager (2015), Brittany Guest (2019) and other members of the collaborative UCLA Access and Innovation in Medical Education (AIME) Fellowship traveled to Chile in Sept 2019 to lecture at Conceptos. It was the largest Conceptos conference to date with more than 800 attendees from all over Latin America. Australian EM providers Cliff Reid, Chris Nickson, and their crew brought Resuscitology (https://resuscitology.com/) to Chile as a pre-conference workshop, and needed an additional faculty for the workshop so invited Sara Crager on-board.

Brittany Guest and the group has also been working with the Emergency Medicine Kenya Foundation. She taught part of an EKG course at the very first EM conference in Uganda. Kenya does not yet have an emergency medicine residency program, so there is currently an 18 month diploma course that allows physicians to obtain a certificate in Emergency Medicine. Britt spent a couple weeks over the summer teaching at the diploma course and is headed back January 2020.
Resident Elective Spotlight - Theresa Cheng MD/JD and the ACLU

Theresa Cheng (2021) has an uncommon distinction of being an MD/JD. She took time off after her second year of medical school to get a JD at UC Berkeley School of Law specializing in International Law. During her law school years before returning to medical school she worked on several projects including (but not limited to): The Sho Sato Conference helping with guidelines and recommendations for international legal responses in disaster relief, founded the East Bay Community Law Center Clinic Health Policy Project, interned for Next Generation Think Tank (evaluating health policy reform impacts of the ACA), worked at the International Human Rights Law Clinic in Berkeley, and the United Nations Development Programme in Bangkok, Thailand. Returning to medical school and residency has not stopped her from continuing her work for social justice (see the kudos page for her work assisting migrants and refugees detained in Tijuana, Mexico). She combined her two passions during a 6 week elective this fall at the Reproductive Justice Department of the American Civil Liberties Union - Northern California spearheading an effort to examine the reproductive health maltreatment and neglect in California detention centers. She worked to produce a legal-medical toolkit for community advocates to use as a result of her investigations. She collected a number of stories of women having miscarriages in buses, without seeing a medical provider, and pregnant women who were shackled in detention centers, infants being fed spoiled formula as well as the women and children who had been deported to Mexico without any resources like food or diapers. She traveled to Mexicali, Mexico to interview women, children, and LGBTQ individuals who have been released from detention centers to document for the ACLU their experiences in the detention centers (no provision of medical care, just interviews). This is in conjunction with the detention center visits she lined up during her elective as well. She drove to Mexicali, Mexico and took the opportunity to fill her car with supplies for a local shelter there.

Theresa has also been working with the ACLU to affirm women’s reproductive rights and physicians’ rights to discuss and treat all patients without interference. One in every 6 hospital beds in California is in a Catholic Hospital system, thus subject to religious doctrine, endangering patient safety, limiting patients’ reproductive and gender-affirming choices, and constraining medical student/resident/fellow education. The UC system was looking to strongly affiliate with Dignity Health, a Catholic hospital system, and the affiliation would require medical students, residents and attendings at those sites to comply with Catholic directives that would prohibit medical students and staff from providing, or referring patients to, reproductive and gender-affirming services. (You can read about this in the LA Times.) Other contracts specifically lists prohibited procedures, including "promotion of contraception" and treatment of victims of sexual assault under certain circumstances. Theresa helped to organize a petition across the UC system to UC leadership, urging them to avoid any future agreement that would subject UC providers or patients to religious restrictions on health care.

Related to her work for immigration Theresa was invited as the keynote speaker for the Greater Bakersfield Legal Assistance Annual Community Conference on social justice.
October 2019 - Los Angeles was on fire... literally. Photos of the retardant drop are just outside the Olive View entrance, and flames visible from the 210 Oxford exit at the am/pm parking lot.

A little Halloween conference costume contest to keep things interesting.

Three of our best teachers on shift all at the same time, the 90s were some great years in the residency! Thanks Rich Sonner (1996), Carolyn Sachs (1994) and Tom Graham (1995) - looking good.

Happy Thanksgiving - Thanks to the UCLA crew who worked so others could spend time with family.

We had Christmas parties for both departments, and a residency potluck hosted by Rebecca Bavolek to ring in the season. The band, Gravely Disabled entertained the crowd at the Olive View UCLA Christmas party.
Alumna Ilene Claudius (2002) came back to provide state of the art pediatric EM education for the care of sickle cell patients to our residents.

Educational Outtakes

Conference EMS Day at Manhattan Beach

Thanks to Atilla Uner (1997) and the LA County Fire Department for a great conference. Seriously, this was our conference day….training at UCLA is tough. As always it was a hands-on experience with our EMS education. The goal of EMS days is for Emergency Physicians in training to get to know the people who work in EMS and the challenges they face. The Lifeguards are experts in water rescue and everyone learned a lot.

Fall 2019 check-in with the class of 2023. A little more swag for the interns, because baseball caps are great for sunny So-Cal, and despite the suggestion in the photo we are not sponsored by LaCroix sparkling water.

Alumna Ilene Claudius (2002) came back to provide state of the art pediatric EM education for the care of sickle cell patients to our residents.

ALUMNI - Come teach at our conferences: If you will be in Los Angeles and want to lecture at one of our conferences, or teach a small group, email Richelle Cooper (1998). (Richelle)
Growing Families - Congratulations to Everyone!

Nicole Wojtal had a second daughter, Romi Paz. The addition has made her big sister Neve a bit of a basket case, but Nicole anticipates that will soon calm down.

Jason Singer (2021) and his wife, Libby, had a healthy baby girl, Layla Danielle Singer.

David Bernheimer (2010) welcomed his second daughter Abigail, and big sister Hannah is sometimes adjusting to the addition.

Mary Cheffers and former research fellow Todd Schneberk (2018) welcomed daughter Grace.

Congratulations - Elaine Lee (2014) and Matt Kwok were married this summer.

Britt Guest (2019) and Flo Raths, married during her intern year, finally had a wedding celebration with many UCLA folks in attendance.

Jason Lu (2019), has been doing great with the Long Beach EM group with several new UCLA hires joining soon. He did find time to get official engagement photos.
Congratulations to **Anna Yap (2022)** for being recognized with the *Rising Star of Physician Leadership Award* from the Los Angeles County Medical Association and being honored at the Celebration of Women in Medicine Awards Luncheon.

**Carolyn Sachs (1994)** traveled to Sydney, Australia to go to the *2019 Preventing Overdiagnosis Conference* and presented her work on the over diagnosis and over treatment of latent TB in health care workers. After traveling all the way down under she was able to take in some of the amazing outdoors.

**KUDOS to Our Amazing Faculty, Residents and Alumni**

**Rebecca Bavolek** taught at the ACEP Teaching fellowship again, and education fellow **Kellie Kitamura (2019)** is enrolled in the program this academic year.
More Kudos

The UCLA Ronald Reagan | Olive View Faculty Teaching Award created in 2013-2014 recognizes exemplary involvement in resident education, both at the bedside and through participation in didactic sessions. The faculty who received the most resident votes for the 2019-2020 UCLA/Olive View Faculty Teaching Award – 1st half of the year are:

George Lim, MD at UCLA & Jackie Shibata, MD OVMC

Congratulations to these amazing teachers! The ultrasound section is really leading the pack.

Congratulations Claudie Bolduc (2021) who received a shout out from EMRA for her work as the ED Practice Management Association Scholar.

Congratulations to Matt Waxman (2007) for being honored at the Drugs & Diagnostics for Tropical Diseases Health for All Humanity with the Hero in the Field Award. This annual award was bestowed on Matt for his global clinical and research work during the Ebola epidemic, fieldwork during the Battle of Mosul in Iraq, and recently as medical director of NYC Medics Global Disaster Relief.

Congratulations to Eric Savitsky (1995) for being awarded two patents for ultrasound training educational technologies from USPTO. (System and Method for Extended Spectrum Ultrasound Training Using Animate and Inanimate Training Objects, and System and Method for Augmented Ultrasound Simulation using Flexible Touch Sensitive Surfaces.) He also became Basic Endovascular Skills for Trauma (BEST) certified (i.e., REBOA) by the American College of Trauma Surgeons to enable UCLA EM participation, education, and integration into future RRUCLA ED provider usage.

Physicians Caring for Migrants Are 'Screaming Into the Void'

Theresa Cheng (2020) was featured in a Medscape article profiling her work with migrants at detention centers and the UCLA Asylum Clinic. The article also features expert comments from Rob Rodriguez (1994) and brings attention to his publication in PLoS One completed with our incoming IDHEAL fellow Jesus Torres, Luis Lovato (2004), and Breena Taira.

Declared impact of the US President’s statements and campaign statements on Latino populations’ perceptions of safety and emergency care access

Robert M. Rodriguez, MD, Jesus R. Torres, Jennifer Sun, Harrison Alter, Carolina Orellas, Mayra Cruz, Leah Reamiew-Wong, Aleeth Aleman, Luis M. Lovato, Amparo Wong, Breena Taira

Our Hero in the Field Award recipient this year is esteemed Associate Professor of Emergency Medicine and Internal Medicine at the David Geffen School of Medicine at UCLA, Dr. Matthew Waxman. Dr. Waxman has worked internationally with a number of NGOs including an Ebola treatment center in Sierra Leone during the 2014 epidemic. He has published research in The Lancet, determining outcomes of survivors of Ebola virus disease during the 2014 epidemic. He has also contributed to work with the United States Centers for Disease Control and Prevention on a study of a commonly used malaria drug. Dr. Waxman’s most recent work includes leading a trauma stabilization point in Northern Iraq during the Battle of Mosul in 2017. He currently serves as Medical Director of the NGO NYC Medics Global Disaster Relief which is assessing a WHO funded project in Yemen.
Congratulations to **Theresa Cheng (2021)** who had two abstracts accepted for presentation at the American Public Health Association meeting this year. The first, “Forensic Medical Examinations: The Increasing Need for Health Professionals in the Legal Asylum Process,” for which she received an award for the highest scoring abstract in the section, and the second “Senate Bill 1152: Implementation of California’s Solution to Patient Dumping in Emergency Departments.”

Hello Kaiser South Bay and all our alumni there where **Priscilla Hanudel (2012)** was promoted to Assistant Chief of the ED for the group and **Heather Whitlow (2014)** made partner.

Congratulations to **Jennifer Weinberg (2014)** who recently took an academic position at the University of Minnesota in both Critical Care Medicine and Emergency Medicine.

Congratulations **Rebecca Bavolek** who was named to the ACEP Educational Meetings Subcommittee and will be a part of the team that plans the educational curriculum for ACEP Scientific Assembly 2020 in Dallas, TX.

**Andy Grock** continues to serve on the AAEM Wellness committee and CORD Best Practices Committee. He is the Chair of the AdvanceED Cal-ACEP Poster Presentation Sub-Committee and a Member of the AdvancED Cal-ACEP Planning Committee.

**Parveen Parmar (2008)** advocates for social justice and health equity with SCOPHE (Southern California Providers for Health Equity).
Jessica Oswald (2018) had the UCSD ultrasound of the month (view here), for a case in which she pushed TPA for a sub-massive PE with evidence of continued deterioration, DVT, and McConnell sign on bedside US. She continues to split her academic time in the UCSD ED and pain management and recently published a paper with Varun Shahi (2020) (see the publications list at the end of the newsletter), as well as Woolley CA, Oswald J, Chen J. Painful Inguinal Angiomyomatous Hamartoma Responsive to Conservative Pain Management: A Case Report. A A Pract. 2019 Nov 15; 13(10):373-375.

Congratulations to Jennifer Termeer (2013) who is now the ED Chair and Department director at Rappahannock General Hospital in Virginia.

Valerie Norton (1995) now works half time as one of the Physician Operations Executive for Scripps Mercy Hospital, San Diego. This has resulted in lots of fun and important projects that she has helped foster, like improving medication reconciliation, lab stewardship, launching a Geriatric ED, POCUS governance, care affordability projects, physician job satisfaction initiatives, and reducing surgical site infections. She also helped the hospital successfully land a bunch of grants to start a program for MAT with Suboxone.

David Talan (1986) was the keynote speaker, delivering the Gregory Henry 50th American College of Emergency Physicians (ACEP) Anniversary Lecture at the Michigan Chapter of ACEP Assembly “What I’ve Learned Studying Infectious Diseases in Emergency Medicine," and "Will Surgeons Lose the Appendix to Emergency Physicians?” Closer to home, he has created and been presenting a very popular new case-based Advanced ID Lecture Series for our residency program.

Applause

Craig Goolsby (2008) was featured in a doximity article highlighting his grant funded research (a collaboration between Uniformed Services University of the Health Science’s National Center for Disaster and Public Health and the American Red Cross). He has developed a trauma first-aid course to train high school students around the country that incorporates elements of Stop the Bleed.

Craig has had a very productive and momentous academic year. He was promoted to Professor of Military and Emergency Medicine. This past June he received the Chairman’s Award for his work with the American Red Cross Scientific Advisory Council. He has had several national talks at various conferences in the past few months including: the American College of Chest Physicians Annual Meeting, the Cardiac Arrest Survival Summit, the Human Factors and Ergonomics Society Annual Meeting, and the International Trauma Life Support Meeting. This past fall he gave a keynote address at an international disaster conference at Linkoping University in Sweden. He continues to work on his grant funded research and has had several publications in the past year.

Big shout out to IDHEAL faculty, and former UCLA research fellow Todd Schneberk for his testimony before congress about the health and human rights implications of “Remain in Mexico”. You can view his testimony online.

Plaudits

Richelle Cooper (1998) traveled to Washington DC to participate in a conference convened by Shannon Brownlee (center of photo above) from the LOWN institute and RightCare Alliance to help focus agenda on the centrality of harms for understanding overuse. The gathering had an impressive collection of leaders in the field studying overuse, and Richelle is still not sure how she had a seat at the table with the group but was very grateful to be part of the conversation.

Congratulations to education fellow Stephen Villa who has a couple radiology posts on Academic Life in Emergency Medicine (ALiEM) - EMRad: Can’t Miss Elbow Injuries and EMRad: Radiologic Approach to the Traumatic Elbow.

The World Congress of Ultrasound in Medical Education is an international, multi-specialty annual meeting of medical educators who present innovative ways to teach and integrate ultrasound education. It is sponsored by the international organizations WINFOCUS and SUSME. The 7th world congress was held at UC Irvine September 2019. Alan Chiem and Jackie Shibata were conference organizers as the Integrate track chair and Insonate track co-chair (along with Teresa Liu of Harbor-UCLA), respectively. Our fellow, Amir Tabibnia, served as faculty for the pre-course POCUS bootcamp. In addition, UCLA physicians Dean Ed Ha (IM) gave a presentation on Entrustable Professional Activities, while Michael Yeh (Surgery) discussed how POCUS improves his ability to manage complex thyroid cancers. Jim Lister (Anatomy) presented our 3D printing projects involving ultrasound education, and George Lim (EM/CC), Danny Kahn (IM), Manny Singh (Harbor-UCLA EM) discussed our new Ultrasound Peer Education Project (USPEP) and how to teach POCUS on clerkships. Lastly--but certainly most importantly--our trainees also had an opportunity to participate at WCUME, including our EM resident physician, Jessa Baker (2021), and Ultrasound Student Interest Group officers (Sahl Ali, Danny Le, Harshika Chowdhary, Jacob Guorgui, Jamie Yang, and Yasmeen Dhindsa).
In November 2019, Annals of Emergency Medicine published a supplement containing the proceedings of the Inventing Social Emergency Medicine Conference. The consensus conference co-developed by Dr. Harrison Alter, was organized by the Levitt Center, together with the American College of Emergency Physicians and the Emergency Medicine Foundation, and supported by a grant from the Robert Wood Johnson Foundation to convene 50 thought leaders in late 2017. Several current and former UCLA providers participated in the conference and authored the publications including, Jerry Hoffman (1979), former UCLA Robert Wood Johnson fellow Hemal Kanzaria, former research fellow Todd Schneberk, Richelle Cooper (1998), IDHEAL and Harbor-UCLA faculty member Dennis Hsieh, Robert Rodriguez (1994), former UCLA National Clinician Scholar Shaw Natsui, scholarship sponsored resident Theresa Cheng (2021), and Breena Taira.

Congratulations (belated…sorry the newsletter editor missed this for the prior newsletter but wanted to get the shout out) to Allison (Cousineau) Santi (2005) who was recognized with two humanitarian awards for her work to help end human trafficking. The Frist Humanitarian award from the HCA and the Soroptomist Women Making a Difference Award.

The Frist Humanitarian Awards, created in 1971, are a tribute to his lifelong dedication to improving the lives of others. Each year, these awards recognize individuals at HCA Healthcare who demonstrate a level of commitment and caring that goes beyond everyday kindness. “The Frist Humanitarian Award recipients work selflessly to improve the lives of people in need, in their communities and around the world,” says Milton Johnson, Chairman and CEO. “Their commitment to the care and improvement of human life inspires all of us to continue the philanthropic work of HCA Healthcare’s founders.”

The Women Making a Difference Award has been developed by Soroptimist International of Oxnard to honor women who, through their professional and/or personal efforts, improve lives and encourage women and girls in the greater Oxnard Community.
Check out our Alumni

Health-e-Charity, the 501c3 established by alumnus Carlo Reyes (2003) held its annual Bollywood fundraiser which helps support the mission trips and in October 2019 completed a trip to Honduras traveling by bus to villages to provide health care, and education to empower the community with knowledge to improve their health. The testament about the work, “I have enjoyed this trip more than I ever imagined I would. Initially, I thought that I was coming to help them, but the families in these villages have had a profound impact on me. I am constantly humbled by them. The people living in these mountain towns lack basic needs, yet are some of the happiest and kindest souls I have ever met. I have never seen people so grateful for Tylenol, Tums or Muscle Cream. I am reminded that back at home, we have it really great. Honduras has ignited a little fire in my heart. My fuel is emotionally connecting with my patients and to always be kind.” Health-e-Charity will be going to Haiti in February and then to India in March. If you are interested in joining there is still availability - contact Carlo Reyes.

Mike Casner (2017) has been enjoying his new job at University of Kansas City with another former UCLA chief resident Steve Go (1994).

Mary Sun (2013) took a break from work at Torrance Memorial, and part time clinical faculty at UCLA, to travel with family to see the largest living thing in the world. General Sherman in Sequoia National Forest. Representing coincidentally in her UCLA EM residency shirt.

Congratulations to Tabitha Cheng (2018), who finished her EMS fellowship June 2019, and is currently working in Boston, caring for daughter Natalie and supporting husband Tim completing his orthopedic sports medicine fellowship, will be returning to Los Angeles July 2020 to start her Pediatric EM Fellowship at Harbor-UCLA. She says this will be her final fellowship…we shall see, but we are excited to have her coming back under the umbrella of the UCLA EM Department.

Brian Truong (2018) has joined the group at Torrance Memorial, adding to the many alumni and chief residents from our program.
Congratulations to **Andie Takemoto (2018)** who took a full time job with the Long Beach EM group that covers Little Company of Mary in San Pedro and St. Mary’s in Long Beach. She joins **Sripha (Ouk) Chan (2008)** and **Jason Lu (2019)**, and will soon be joined by some from the class of 2020. Andie will continue to do part time clinical work at Olive View adding to our ultrasound team.

Congratulations to **Sophie Terp (2012)** who continues her research on various aspects of EMTALA violations (see the last newsletter for all the media on her review of psychiatric emergency violations), and has led to several grand rounds lectures this past year and an abstract presentation at ACEP 2019 - Terp S, Axeen S, Menchine M. Emergency Medical Treatment and Labor Act Violations for Recipient Hospital Responsibilities, 2005-2014. *Ann Emerg Med* 2019 ACEP Research Forum Supplement. 2019 October; 74(4S): S61.

---

**Tyler Barrett (2005)** was nominated by his CMO to participate in a highly competitive leadership training program established by the Tennessee Medical Association. He is one of 2 Vanderbilt University Medical Center physicians selected to participate in the Tennessee Medical Association’s **John Ingram Institute for Physician Leadership** in 2020. “Drew Franklin, MD, MBA, assistant professor of Clinical Anesthesiology and medical director of the Pediatric Pain Management Service at Children’s Hospital; and Tyler Barrett, MD, MSCI, associate professor of Emergency Medicine and medical director of the Adult Emergency Department, will be participating in the Physician Leadership Lab, a seven-month course that helps physicians acquire the skills to become quality leaders in team care settings. Areas covered by the course include implementing change leadership, creating a culture of high reliability and delivering better clinical and financial outcomes.”

---

Congratulations to **Chuck Pozner (1995)**! If you did not know, he is the co-founder and founding medical director of the Neil and Elise Wallace **STRATUS Center** for Medical Simulation at Brigham and Women’s Hospital/Harvard Medical School. Under his leadership since 2003, the center has grown from being exclusively for emergency medicine to serving as the simulation center for the entire academic medical center. Chuck and his colleagues at the STRATUS Center are working with NASA on their mission to Mars. The research is investigating objective measures of behavior using biometrics to better identify and train a new breed of astronauts who will work and respond to medical and other crises in austere and uncharted territory of deep space. As a part of the project, they have constructed a life-sized simulated International Space Station (ISS) medical bay in their center that enables them to simulate scenarios and gather data. They have already received 1.2 million dollars in grant support from NASA’s National Space Biomedical Research Institute. The team at STRATUS is also working with Hollywood producers (Ford vs. Ferrari) on novel cinematic augmented reality technology to enable truly immersive training in the “payload light” environment of a Mission to Mars. Chuck continues to lecture nationally, and conduct research, and his team has just received two R01’s totaling $7.3 million. He was recently in Los Angeles to meet with some Hollywood folks and stopped by the ED at RRUCLA.
Angelique Campen (2000), in addition to her regular charity at the Painted Turtle, goes on a medical mission every year. This year she traveled to Nepal and together with Nepali, Australian and American practitioners (Medical Trekt Nepal) the group was able to help over 1000 patients in remote mountaintop villages with no access to medical care. Angelique recounted, “For 2 1/2 weeks, every other day, we trekked to a new village (often 8-9 hours, at altitude, in 90 degrees, in rain, up steep mountains, WITH LEECHES crawling up me). It physically took me to my limit but, once again, renewed my passion for medicine and fanned the fire in my heart. Next year is Panama. I welcome anyone to join me... life changing. #travelWithPurpose.”

Calling out to all Alumni

Do you have something to share with the UCLA EM residency for the alumni family or kudos page? Send updates any time during the year.

Are you available to come and guest lecture to our residents?

Will you be coming to SAEM in Denver May 2019? We want to catch up and see you.

Send any of these updates to the newsletter editor, at Richelle Cooper (1998).

Talan DA. When the Antibiotic Combination "Vosyn" is not Enough. ACEP Now. 2019:38 (11): 1,10,15.
